01:13:55   Claude Buettner:
Q: What is known about application of AI to the Dark Web?

01:15:02   Samrat Bharadwaj:
C: AI and AI machines cause huge emissions. There is nothing called a free lunch.

01:30:40   Richard van der Jagt:
C: Witness the need for the dockworkers for job security.

01:31:33   Art Hunter:
Q: I have a question to ask at Q&A time.

01:35:09   Richard van der Jagt:
Q: If a self driving car has an accident, who is charged?

01:41:48   Samrat Bharadwaj:
Q: With such super-abundance of information, knowledge AI, etc., why is the world actually turning darker in terms of misinformation, fake news, hate, anger, propaganda? Does AI serve humanity or the other way round?

01:44:32   Samrat Bharadwaj:
C: Also, AI is related to 'Surplus Behavioral Data' (SBD) and 'Surveillance Capitalism.' I'm a bit surprised that the terms have not shown up.

01:57:55   Jon Legg:
Q: Could it be that erosion of trust is simpler to target? Guardrails and voluntary rule require discipline and limits; criminal activity require only selfish interests showing themselves.

02:03:52   Samrat Bharadwaj:
C: Quoting Soshana Zubhov on Surveillance Capitalism. SBD also introduces its own distinct laws of motion, of conquest, and of control. Behavior and response too can be colonized and subverted to serve economies of scale and scope. Our behavioral modification is synonymous with the proliferation of surveillance capitalism and artificial intelligence.

02:21:31   Dale Armstrong:
C: ChatGPT allows fabricates journal article references.
