(C) There is no entry for nature in the growth activities. It is not important?

13:52:40 From Mike Nickerson To Everyone:

How much popular pressure is necessary to get governments to move in such directions?

14:08:39 From Claude Buettner To Everyone:

Question: Has this modeling been shared with the G20's Network for Greening Financial Systems: <https://www.ngfs.net/en> ? Their early 2022 suggestion that 8 to 9% of global GNP be spent Annually till 2050 to reach the Net-Zero 2050 goal seems to be universally ignored. Therefore the Ecological Overshoot Unravelling needs to be managed it would seem, rather than avoided. What would change in your modeling and planning if that is the case?

14:14:07 From Jon Legg To Everyone:

Q: Daniel: Your model of a steady-state economy seems to tie down many things to fixed quantities or positions vis-a-vis other things. Do you get pushback from politicians for removing the freedom to grow the economy?

14:26:10 From Raymond Murphy To Everyone:

Growth of what? Bicycles or planes, cruises, and cars. China.
